

Download the Carbon Budgeting Tool

To use the tool, please download both files:

- **Excel Upload Template** – enter your emissions data
- **Power BI Dashboard Template** – view and analyse results

Both files are required.

How it works

1. Complete the Excel template

- Enter your Local Authority and Year.
- Add emissions data by Activity, Scheme, and Material/Action.
- Do not change the table structure.
- Save the file.

2. Open the Power BI dashboard

- Load your completed Excel file.
- Explore emissions by year and emission source.
- Select a net-zero target year to view residual emissions.
