Background

The Association of Directors of Environment, Economy, Planning and Transport (ADEPT) represents Place Directors from county, unitary and metropolitan authorities, along with Local Enterprise Partnerships and corporate partners drawn from key service sectors. ADEPT members are at the very heart of maximising sustainable growth in communities throughout the UK. We are delivering the projects that are key to unlocking broader economic success and creating more resilient communities, economies and infrastructure.

The South West Board

Remit

The South West Board leads ADEPT's understanding and response to strategic issues and policies in the South West of England. The Board understands that, while sometimes local authorities in the region have differing priorities, economic growth is a shared aspiration and often needs to be unlocked and fostered through joint partnership working. In all situations sustainable growth requires good quality planning, investment and infrastructure.

The South West Board has a broad and diverse remit and provides the space for its Member organisations to respond to, influence and support each other in addressing and implementing strategic policies and issues that are of relevance to its area of focus. However regular items include the progress being made by the region's subnational transport bodies; Western Gateway and Peninsula Transport, climate change and the environment, discussions with government departments and partner agencies on policy changes, consultations and place based funding, the challenges faced by local government, and the response to the COVID-19 pandemic.
